IEG PI NOTICE

No. 87-75

TITLE/SIGNIFICANCE:

The first identification of an SS-5 warhead mating exercise.

COMMENT:

An SS-5 warhead mating exercise was in progress with a warhead on a flatbed truck aligned with and directly in front of the missile. The warhead was in a horizontal position on the truck bed under two inverted braces, which were attached to the truck. These braces are probably part of a framework which precisely positions the warhead onto the missile.
